CAREER OBJECTIVE

Aspiring Software Engineer with a focus on creating user-centric, real-world applications using Full-Stack, AI, and modern development practices. Eager to contribute to innovative projects that solve meaningful problems and enhance human experiences through technology.

EDUCATION

B.Tech, Computer Science & Engineering Kalasalingam Academy Of Research And Education CGPA: 7.64/10	2022 - 2026
Senior Secondary (XII), Andhra Pradesh Science Resonance Junior College, Vijaywada Percentage: 78.00%	2022
Secondary (X), ANDHRA PRADESH STATE Narayana Junior School, Tadipatri Percentage: 100.00%	2020

PROJECTS

[Food Express ↗](#)

Jun 2025 - Present

Developed a responsive and interactive front-end food ordering web application designed specifically for college campus canteens. Built entirely using HTML, CSS, JavaScript, and Bootstrap, the platform includes separate login modules for customers and restaurant admins, with OTP-based user verification simulated through frontend logic. The interface supports key features such as menu display with item images and prices, cart management, order placement, and a clean user flow from login to order confirmation. Implemented front-end logic for features like auto-logout after inactivity and real-time alerts to simulate user notifications. The UI is fully responsive and optimized for both desktop and mobile views, delivering a smooth and intuitive experience. Structured in a scalable way, the project is ready for backend integration using technologies like Node.js and MySQL in the future.

SKILLS

- HTML
- CSS
- Python
- Machine Learning
- Deep Learning
- Effective Communication
- Client Relationship

EXTRA CURRICULAR ACTIVITIES

- Dedicated to building real-world projects focused on solving human-centric problems with practical and scalable solutions.
- Organizing College Events/Tech Fests
- Actively Participating in Hackathons and other technical events

ADDITIONAL DETAILS

- Secured first prize in the kare oss hackathon conducted in kalasalingam university.
